

Personal Security Audit Checklist

Project 01 | Completed initial assessment

This checklist records the assessed state, assigned risk, corrective action and verification status for all required controls. Pending items must be verified before they are described as completed.

#	Control	Finding	Risk	Action	Status
1	2FA and MFA	SMS enabled	Medium	Upgrade to authenticator or passkey where supported	Awaiting user evidence
2	Password reuse	No reuse identified	Low	Maintain unique passwords	Maintained
3	Password manager	Google Password Manager	Low	Continue secure use	Maintained
4	Device lock	PIN enabled	Low	Maintain lock and short auto-lock	Maintained
5	OS updates	Up to date	Low	Keep automatic updates enabled	Maintained
6	Application updates	Up to date	Low	Install updates promptly	Maintained
7	Browser extensions	Trusted only	Low	Review and remove unused extensions	Maintained
8	Browser permissions	No untrusted sites	Low	Continue periodic review	Maintained
9	Application permissions	No unnecessary access	Low	Continue least privilege	Maintained
10	Backups	Manual	Medium	Enable automatic backup and verify restore	Awaiting user evidence
11	Account recovery	Not configured	High	Configure recovery method and store codes securely	Awaiting user evidence
12	Antivirus and security	Enabled	Low	Keep real-time protection updated	Maintained
13	Public Wi-Fi security	Safe practices	Low	Continue HTTPS and firewall practices	Maintained
14	Breach exposure	One reported breach	High	Change affected and reused passwords; review sessions	Awaiting user evidence

Post Remediation Verification

Verification item	Done	Evidence
2FA upgraded where supported	☐	Redacted settings screenshot
Automatic backup enabled and successful	☐	Status showing recent backup
Account recovery configured	☐	Recovery details fully redacted
Affected and reused passwords changed; sessions reviewed	☐	Security activity, no identifiers

Evidence Safety Check

- ☐ No passwords, PINs, OTPs, QR codes, backup codes or recovery codes are visible.
- ☐ Email addresses, phone numbers and device identifiers are redacted.
- ☐ Only sanitized evidence is included in the private submission folder; no evidence is published to GitHub.
